Please note: Our 2013 Observership Programme is now closed. Applications for our 2014 Programme will be considered after 11th NOVEMBER 2013.

Austin Health offer a three week Observership program for International Medical Graduates within the Emergency Department. This program enables the Observer to shadow an Emergency Physician over the three weeks, to evaluate the clinical management of patient care and acts as an orientation into the Australian Health system.

We have limited places throughout the year and we have substantial interest in our programme. In order for Austin Health to maintain a focused and comprehensive programme we are only able to take one observer at a time. We have a number of criteria that Austin Health requires to be met, before considering an application. This criteria is as follows:

- Passed Australian Medical Council MCQ Examination (Part 1) AND Australian Medical Council Clinical Assessment Examination (Part 2)
- Australian Citizenship or Permanent Resident
- IELTS Test Pass (Average of 7 or above overall) or OET Pass (B or above in each category) that is less than two years old
- Primary Medical Degree completed less than 10 years ago
- Internship completed in country of study

Should you meet all the above criteria we would be happy to consider you for an observership.

For the 2014 Observership Programme we will be considering applications from 11th November 2013. We cannot consider any applications prior to this date.

To apply please send your CV and evidence of all the above criteria to HMOrecruitment@austin.org.au.
